

HDT

ACCESSION COMMUNICATOR

Take Your Office Anywhere!

Your working life moves constantly from desk to laptop, to mobile smart phone, to iPad. Now you can use all the features of your HDT phone services from almost any device, whether at your desk, at home or on the move.

Save Time, Do More

These are a few of the things you can do with Accession Communicator on your mobile phone, tablet or desktop PC when it is paired with your HDT desk phone service:

- Call from anywhere. Make and receive calls on your mobile as though you were at your desk. With single number convenience, the person you call will see your HDT desk phone number. Now you can choose who sees your mobile number.
- Receive calls on any device. When someone calls your primary number, the call will appear on one or more of the devices that you have set up. This may include your desk phone, your mobile phone, your PC or Mac, or tablet devices. You may answer the call on whichever device is most convenient for you.
- Seamlessly transfer calls. Start a call on Wi-Fi then switch it to cellular if you move out of Wi-Fi coverage. Then move a call to your fixed line when you arrive at the office.
- Call Manager. The call manager helps with all these features. It also makes it easy to mute calls, transfer calls, make three-way calls, place calls on hold, record calls (where local laws permit) and adjust the microphone or headset volume.
- Upgrade your calls to video. If the person you are calling has a compatible service. You can also choose to uplift the call to a video call.

Powerful Features, Easy To Use

One number reaches you anywhere and you can manage your calls and contacts from anywhere, too.

- Integrate your contacts from any device. Accession Communicator presents you with a consolidated list of contacts from several sources.

Re-imagine Your Communications

Accession Communicator saves you time and helps you work and communicate more effectively wherever you are.

Easy Set Up

It's easy to download and install the app on your smartphone, tablet, PC or Mac.
